| <b>Physical Parameters</b>   |   |              |
|                              | Foreign matter  | Max.%5       |
|                              | Immature root   | Max.%5       |
|                              | Moisture  | Max.%10      |
|                              | Colour  | Dark yellow  |
| <b>Chemical Parameters</b>   |   |              |
|                              | Glycyrrhizin Houseman   | 11,1         |
|                              | Glycyrrhizic Acid   | 2,8          |
|                              | DDE-p,p   | 0,014 mg/kg  |
|                              | DDT,total   | 0,016 mg/kg  |
|                              | Pthamilide  | 0,025 mg/kg  |
|                              | Folpet  | <0,010 mg/kg |
|                              | Folpet/ Pthamilimide total  | 0,051 mg/kg  |
| <b>Biological Parameters</b> |   |              |
|                              | TPC   |              |
|                              | Ochratoxin A  | <0,020 mg/kg |
| <b>Shelf life</b>            | 36 months   |              |
| <b>Bale weight</b>           | Between 60-70 kgs in PP bags  |              |
|                              |   |              |
|                              |   |              |
